# 1. General & Overview

## 1.1. What is ADNOC Logistics & Services plc?

ADNOC Logistics & Services plc (the “Company” and together with the ADNOC Logistics & Services plc business taken as a whole, as the context requires, the “Group”, and “we” and “our” as used herein refer to the Group) is a global energy maritime logistics leader and the dedicated and vital logistics arm for ADNOC, the state-owned energy company of the Emirate of Abu Dhabi in the UAE.

The Company provides market-leading, reliable and cost-competitive maritime and logistics solutions across ADNOC’s entire value chain through its three key business units:

- a) *Integrated Logistics* through which we believe we are one of the largest end-to-end, fully integrated energy logistics service providers for the energy sector and one of the largest owners and operators of self-propelled, self-elevating jack-up barges. In addition, we operate what we believe is one of the largest energy logistics bases in the GCC region in Mussafah and one of the largest single warehouses in the Middle East in KEZAD.
- b) *Shipping* through which we believe we own and operate one of the largest diversified shipping fleets in the GCC region of more than 500 modern and technologically advanced vessels, including 56 owned vessels, six VLGCs owned by AW Shipping Limited and vessels which are either contractually committed or contracted and under construction for scheduled delivery between 2023 and 2026. We provide market leading commercial shipping and ship management as well as chartering services for the transport of crude oil, refined products, dry bulk and gas (LPG and LNG).
- c) *Marine Services* which operates a fleet of 65 specialised vessels. Through this business unit, we provide a wide range of specialist services relating to marine terminals, all petroleum port operations in the Emirate of Abu Dhabi and oil spill and hazardous and noxious substances response operations. We are one of the largest oil spill and hazardous and noxious substances responders in the UAE.

## **1.2. What is ADNOC Logistic & Services Group's growth strategy?**

Our growth strategy is as follows:

- a) Expand the scope of services provided to ADNOC Group:
  - ADNOC and the UAE have made significant investments in the energy sector and expect to continue to do so, with ADNOC announcing in late 2022 its USD 150 billion investment program for the five-year period 2023 to 2027 (inclusive).
  - As the logistics and maritime service provider of choice to the ADNOC Group companies, we expect ADNOC's sizeable investment program to serve as a major growth catalyst for us, providing numerous opportunities to our business both directly and indirectly.
  - We are targeting a two-fold increase in ADNOC's production volumes to be transported by us by 2030, while growing our share of ADNOC's increased exports in the future.
  - Our strategy envisages maximising our share of ADNOC's targeted logistics spend, hence increasing volumes, services and our owned fleet in order to deliver added operational efficiencies.
  - We intend to make additional investments targeted at supporting ADNOC's exports of hydrogen derivatives and expanding our marine services solutions.
- b) We are focused on decarbonisation efforts and believe we are able to help drive the energy transition in the UAE.
  - Our aim is to contribute to achieving the UAE's 2050 net-zero target in line with the International Maritime Organisation's decarbonisation targets. We aim to lower the annual greenhouse gas emissions from international shipping by at least half by 2050 (compared with the 2008 levels) to reduce carbon intensity of international shipping, in particular to lower the carbon dioxide emissions per transport by at least 40% by 2030 while aiming towards 70% by 2050 compared to 2008.
  - We have invested or committed approximately USD 2 billion in environment-friendly, new-build vessels with scheduled delivery dates between 2023 and 2026. Furthermore, we have reduced the fuel consumption of our LNG fleet in 2015 by 40% compared to 2012 and, with the delivery of our new modern vessels, expect to further significantly reduce the fuel consumption in the medium term.

- c) Expand our relationships with, and scope of services provided to, our existing and new clients.

We see significant potential in further leveraging and strengthening relationships with our existing clients and expanding the scope of our services to new clients.

#### *Shipping*

- As part of our growth strategy supported by our business plan and internal forecasting models, we intend to increase the scope of our international shipping services and our fleet size in the future to benefit from changing global trade patterns and forecasted growth of global oil and gas production, sulphur exports and global expansion of operations by our clients.

#### *Integrated Logistics Services Platform (ILSP) Model*

- In March 2023, we together with ADNOC Offshore, launched our Integrated Logistics Services Platform (ILSP) at our base in Mussafah. It is one of the largest turnkey offshore logistics offerings in the world designed to enable coordinated end-to-end management of energy logistics and maritime operations. We believe that our ILSP services will contribute significantly to the growth and margin expansion in our Integrated Logistics business unit in the future.

#### *Offshore logistics services for the engineering, procurement and construction (EPC) sector*

- We aim to capture new growth areas by partnering with and supporting EPC contractors with offshore services, in particular through our jack-up barges which are required across all stages from development to decommissioning of a field, including dredging and construction of artificial islands.
- We are one of the largest owners and operators of self-propelled, self-elevating jack-up barges, a leading provider of offshore support vessels and subsea services in the GCC region, with operations across the UAE, KSA, Qatar and China. As a result, we believe that we are well positioned to add significant value to EPC contractors given our experience, existing infrastructure and asset base.

- d) Enlarge geographic footprint and operations

- We intend to continue to pursue our growth strategy aimed at enlarging our geographic footprint and operations outside of the UAE opportunistically and in line with our growth strategy and targeted expansion plans while leveraging our relationship with the ADNOC Group companies.
- In particular, we believe that the increasing offshore energy exploration in North Africa and the GCC region, including in Morocco, Egypt, Sudan,

Jordan, Saudi Arabia and Qatar, and demand for jack-up barges and offshore marine and other services in those and other regions, including in China and the Far East, present potential opportunities for our geographic expansion in the future.

e) Explore entering into new business verticals

- We aim to actively explore entering into new business verticals, including services relating to decarbonisation, which we believe present further growth opportunities for our business.
- We intend to pursue this growth strategy by focusing on various verticals, including: owning and operating green carriers, advising clients on decarbonisation, emissions abatement and other solutions and exploring further opportunities and investments in the hydrogen vessels, storage and distribution sectors.

#### **4.3.What is ADNOC Logistics & Services Group’s approach and policy to Environmental, Social and Governance (ESG) matters and how is the Company contributing to the UAE’s net zero by 2050 initiative?**

We are committed to environmental, social and governance (“ESG”) principles, which are integrated into our strategic objectives. ESG is at the core of our priorities and as a shipping and logistics service provider, we are cognisant of our responsibility to encourage sustainable practices in our policies, operations, supply chains, and communities. We have aligned our strategic priorities to create sustainable value for all our stakeholders — our clients, our employees, our communities and our shareholders.

Our vision is aligned with ADNOC’s ESG strategy. We believe we are a sustainability leader for the UAE’s maritime and logistics ecosystem and we seek to leverage our maritime heritage to enhance the UAE’s status in the global maritime industry. As part of our ESG strategy we intend to (i) reduce our operational environmental footprint; (ii) maintain strong health and safety culture; (iii) promote local talent and in-country value; and (iv) secure responsible supply chain management. ADNOC introduced an in-country value program for its suppliers focusing on local supplier selection, development of UAE nationals and localisation of critical functionalities in the oil and gas industry.

Our ESG targets and approach are in alignment with the ambitions of the ADNOC Group. In particular, we are a major contributor to ADNOC’s 2030 target of reducing emissions intensity by 25%. In addition, our greenhouse gas (“GHG”) and new energy strategies encompass projects focusing on electrification, green power, energy optimisation, flaring reduction and development of carbon capture initiatives. Our GHG emissions estimation and reporting follow ‘US-EPA AP42’ and ‘API Compendium of Greenhouse Gas Emissions Methodologies for Oil and Natural Gas Industry (2009)’ standards, with verification and compliance via ADNOC Group’s HSE function.

We are entrusted with the responsibility to protect the health and safety of our people, minimise the consumption of resources and control emissions to ensure a sustainable ecosystem for future generations. On the social aspect, we are passionate about developing our people through ADNOC centres of excellence and training programs, our health and safety management system focus on operational excellence and safety.

We are committed to fostering an inclusive culture, and to provide equal opportunities for career development and advancement, regardless of gender, ethnicity, age and culture. Our employees come from the UAE and other countries.

We have designed female -focused development programs that we believe have led to an increase in the share of female representation in senior and middle management positions and leadership positions from 10.1% in 2020 to 11.4% as at 31 December 2022. We support our employees' professional development through focused training and talent development programs. As part of our social-related efforts, we promote Emiratisation across our entire organisation. As at 31 December 2022, 2021 and 2020, UAE nationals constituted 35.9%, 32.0% and 29.7% respectively, of all our employees.
